Executive Takeaways & Way Forward

Cloud is not the destination.
Business transformation is.

Reflect | Discuss | Quiz | Act

Session purpose

Consolidate

2-day learning

Test

decision
understanding

Commit

next steps

The final question

What will we do differently after this workshop?

Leadership lens

learning → decisions

decisions → action

Workshop humour

A great workshop is not only a group photo, good lunch, and a folder of decks.

Success

better decisions after the workshop

Session flow

1. Reflection
2. Takeaways
3. Discussion
4. Quiz
5. Action plan

Two-day learning journey

Day 1

fundamentals
service models
deployment
economics

Day 2

platforms
security
AI/data
vendors
canvas

Cloud leadership decision stack

- Business value
- Cloud model
- Platform
- Risk
- Execution

Takeaway 1 | Start with the business problem

Do not start with

platform name

vendor pitch

move everything

Start with

problem

impact

value

KPI

Takeaway humour

Choosing a platform before defining the problem is like buying medicine before diagnosis.

Takeaway 2 | Use the right cloud model

SaaS
ready process
fast adoption

PaaS
custom solution
faster build

IaaS
control
migration

Hybrid
balance
governance

Takeaway 3 | Cloud is not automatically cheaper

Cloud becomes efficient when usage is governed.

Needs

tagging
budget alerts
FinOps
ownership

Cost humour

Cloud is like electricity.
If everything runs, the bill runs too.

Takeaway 4 | Security is shared responsibility

Provider

security OF the cloud

Organization

security IN the cloud

Security humour

The hotel provides locks.
You still close the door.

Always ours

data
identity
access
governance

Takeaway 5 | AI needs data readiness

AI value begins with business clarity and trusted data.

Ask

what decision improves?
what data is needed?
who owns value?

AI humour

AI should not become the intern with confident answers and no context.

Takeaway 6 | Vendors need governance

Evaluate

business fit

capability

Contract

SLA

exit terms

Govern

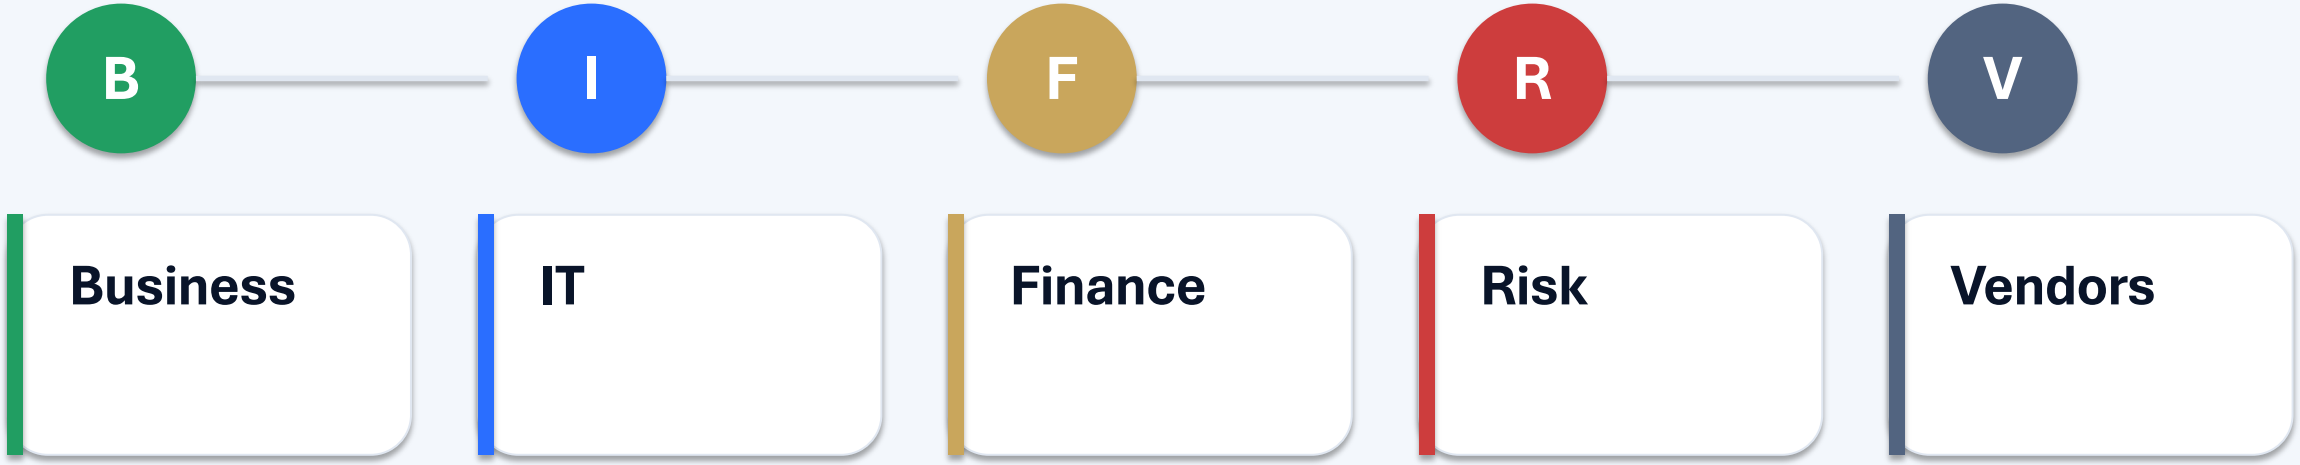
reviews

outcomes

Vendor humour

Every vendor looks excellent in a PowerPoint deck.
The real test starts after the PO.

Takeaway 7 | Cloud strategy needs ownership



Value, cost, risk, and adoption need named owners

Individual reflection

1. Biggest insight
2. Relevant concept
3. Business problem
4. Risk to watch
5. 30-day action

Group discussion

- Best opportunity
- Biggest risk
- Useful framework
- 90-day action
- Leadership support

30–60–90 day action plan

30 days
identify opportunity

60 days
validate feasibility

90 days
launch pilot

Quiz-based reinforcement

Not an exam.
A leadership learning check.

Format

15 questions

discuss answers

apply concepts

Quiz 1

For senior leaders, cloud should primarily be viewed as:

A. server replacement

B. business capability

C. reduce IT staff

D. technical-only topic

Discuss, then reveal

Quiz 2

Best starting point for cloud strategy:

A. select platform

B. lowest-cost service

C. business problem

D. move everything

Discuss, then reveal

Quiz 3

Ready-to-use business software is:

A. IaaS

B. PaaS

C. SaaS

D. Hybrid

Discuss, then reveal

Quiz 4

Custom business application quickly:

A. IaaS

B. PaaS

C. SaaS

D. Private cloud

Discuss, then reveal

Quiz 5

Combines on-prem/private with public cloud:

A. Public

B. Private

C. Hybrid

D. SaaS

Discuss, then reveal

Quiz 6

Correct cloud cost statement:

A. always cheaper

B. no governance

C. governed and optimized

D. no planning

Discuss, then reveal

Quiz 7

TCO stands for:

A. Technical Cloud Operation

B. Total Cost of Ownership

C. Technology Control Output

D. Total Cloud Optimization

Discuss, then reveal

Quiz 8

Organization always owns:

A. data center security

B. data, identity, access

C. hardware maintenance

D. global infra

Discuss, then reveal

Quiz 9

Microsoft enterprise ecosystem alignment:

A. AWS

B. Azure

C. GCP

D. None

Discuss, then reveal

Quiz 10

Strong for data, analytics, AI workloads:

A. GCP

B. private only

C. SaaS only

D. none

Discuss, then reveal

Quiz 11

Main purpose of FinOps:

A. stop cloud spend

B. manage cost and value

C. replace finance

D. only contracts

Discuss, then reveal

Quiz 12

AI/cloud use case selection should prioritize:

A. sounds impressive

B. value + feasibility

C. latest tool

D. vendor says so

Discuss, then reveal

Quiz 13

Vendor lock-in is best managed by:

A. ignore it

B. avoid vendors

C. understand dependency

D. cheapest vendor

Discuss, then reveal

Quiz 14

Cloud Strategy Canvas connects:

A. technical diagrams only

B. problem, model, ROI, risk

C. vendor names only

D. IT tasks only

Discuss, then reveal

Quiz 15

Best leadership mindset:

A. move everything

B. avoid risk

C. selective value with governance

D. vendors decide

Discuss, then reveal

Answer key and scoring

Q1	B	Q2	C	Q3	C	Q4	B	Q5	C
Q6	C	Q7	B	Q8	B	Q9	B	Q10	A
Q11	B	Q12	B	Q13	C	Q14	B	Q15	C

Scoring

13–15 strong

10–12 good

7–9 moderate

<7 revisit

Final leadership framework | CLOUD

C — Clarify problem

L — Link value

O — Own governance

U — Use right model

D — Drive execution

Business alignment checklist

- ✓ Problem clear
- ✓ Value measurable
- ✓ Model selected
- ✓ Security reviewed
- ✓ Cost owner
- ✓ Pilot plan

Clear next steps

1. Identify opportunity
2. Validate impact
3. Engage IT/digital
4. Estimate ROI/TCO
5. Define 90-day pilot

Leadership commitment

In the next 30 days,
I will initiate or support
_____.

Examples

opportunity discussion
cost review
SLA review
AI/data pilot

Final leadership message

Leaders do not need to know every cloud service.
They need to ask the right questions.

Lead with
- value
- risk
- ownership
- execution

Workshop close

Cloud will not automatically transform the business. People, leadership, governance, and execution will.

Mic drop

Cloud is not the destination — business transformation is.

Thank You

Let’s continue the cloud, AI and digital transformation journey.
